October 27, 2026

Rochem International and Pen-G Sign MoU for Exclusive US Animal Health Distribution of Penicillin G Potassium

Planned collaboration would pair production in Sultanate of Oman with Rochem's US regulatory and commercial expertise to diversify supply.

Leaders from Rochem International and Pen-G at CPHI Worldwide in Milan, marking the signing of a Memorandum of Understanding to develop a new source of Penicillin G Potassium for the US animal health market.

HAUPPAUGE, N.Y. and SOHAR, Sultanate of Oman, October 27, 2026. Rochem International ("Rochem") and Penicillin General Integrated Industrial Company (FZC) LLC ("Pen-G") have signed a Memorandum of Understanding outlining a planned collaboration to develop a new source of Penicillin G Potassium, with Rochem intended to serve as the exclusive distribution partner for the US animal health market.

The MoU was signed on October 6, 2026, at CPHI Worldwide in Milan by Matt Thiel, President of Rochem, and Mohammed Abdullah Al Kharusi, Chairman of Pen-G.

Pen-G will manufacture Penicillin G Potassium in Sultanate of Oman. Rochem will lead its commercialization in the US animal health market, with its in-house regulatory expertise for FDA filings and a sales team close to customers.

The aim is simple: a more resilient supply of a medicine that animals, farmers and veterinarians cannot do without. Behind every finished product is a herd, a stable or a family pet.

SIGNED IN MILAN OCTOBER 6, 2026

Matt Thiel, President of Rochem, and Mohammed Abdullah Al Kharusi, Chairman of Pen-G, sign the Memorandum of Understanding at CPHI Worldwide.

“Supply security in animal health is not a procurement detail. It is a question of animal welfare and food safety. Our customers asked for a second source of Penicillin G, and with Pen-G we intend to build it. To every one of them: the door is open.”

Robyn Frisch, Founder and CEO, Rochem International

“We built Pen-G to be a source the world can rely on for one of its most essential medicines. Rochem has earned the trust of the US animal health industry over three decades, and we are proud to start this journey with them.”

Mohammed Abdullah Al Kharusi, Chairman, Pen-G

“Penicillin G is the foundation of any serious animal health portfolio. With Pen-G, ours gains that foundation from a source built for resilience: a powerful and purposeful addition for our customers.”

Oliver Lotz, Vice President, Animal Health, Rochem International

An invitation to customers. Animal health manufacturers who use Penicillin G Potassium are invited to start the conversation early. Contact Rochem's Animal Health team at sales@rochemintl.com; we will share more as the partnership progresses.

About Rochem International

Founded in 1994 and headquartered in Hauppauge, New York, Rochem International develops, sources and supplies pharmaceutical, nutritional and animal health ingredients for leading companies worldwide, backed by in-house regulatory, quality and technical teams.
